

AMENDMENTS TO THE SPECIFICATION

Please amend paragraph [0064] of the specification to read as follows:

[0064] The new cleaning apparatus with ~~single block plastic~~ having a blasting booth made as a single plastic structure with an opening closeable by a hinged door, and further having integrated feeding and filtering devices constructed as described above, offers numerous advantages.

Please amend paragraph [0068] of the specification to read as follows:

[0068] Because the blasting booth (C), and also the support (S) and the shell structures (A1, F1) of the feeding device (A) and/or filtering device (F), can each be produced as one single plastic body, individual components, manual operations and labor for the assembly and fixing of the various parts are considerably reduced.
